Notice of Capital Investment Plan at Vietnam Subsidiary

We hereby announce that at the Board of Directors meeting held today, we resolved the capital investment plan of our consolidated subsidiary, RORZE ROBOTECH CO., LTD. (hereafter RRC) in Vietnam, as follows.

1. Purpose of capital expenditure

In order to respond to the expanding demand of semiconductor market and the changes in technological innovation, we have decided to make capital investments at RRC. Through this investment, we aim to further strengthen our competitiveness and to achieve sustainable growth. Specifically, we will double production capacity to meet the rising demand for existing products and to accelerate market launch by establishing the mass production system of newly developed products. At the same time, we will promote the automation of the production line and improve production efficiency.

As a result, we will build a production system that can respond quickly and flexibly to changes in the market environment and strengthen the supply of products that meet the needs of our customers.

2. Overview of the new plant

- (1) Location: Hai Phong City, Vietnam, Japan Hai Phong Industrial Park (in the current factory and the same industrial park)
- (2) Investment content: Land, buildings, production equipment etc.
- (3) Land area: Approx. 238,300 m²
- (4) Total floor area of the plant: Approx. 180,000 m²
- (5) Planned implementation period: Mid-2025 to 2032

We will implement the capital investment plan in stages. In the spring of 2026, the construction of the new plant in the first phase is scheduled to begin and to be completed in the spring of 2027. After that, we intend to gradually implement the plan by keeping pace with market trends.

- (6) Amount of total investment: Approximately 330 million USD
